Unlocking the Potential of Bamboo

Brian Cohen
Xalapa, Mexico, 14 August 2018
Presentation:

- INBAR overview
- Potentials, challenges and opportunities
- INBAR activities in the region
INBAR is:

• An intergovernmental org w HQ in China
• A group whose mandate is to serve the B&R interests of Member States
• The international commodity body for B&R
• Providing TA in research, strategic planning, policy, training and tech transfer
• An exponent of South-South cooperation
• Getting the word out
• Growing!
Supply potentials:

- It’s either nearby already or can quickly be established
Producer potentials:

- Supplementary income, employment, GDP and economic diversification, gateway solution to a country’s increased industrialization; cultural significance
Consumer potentials:

- $2b in international trade; standards development; links with research centers; links with private sector
Ecosystem services potentials:

- Ecosystem services potentials: biodiversity value; cc mitigation; erosion control, soil amelioration, water regulation = land and water improvements/restoration = cc adaptation
What’s holding bamboo back?

- Not enough info
- The perception problem at all levels
- Integration into green policy dialogues and planning
- The business case

What can we seize upon?

- Growing body of international research
- Growing group of people showing up to the WB Congress and BARC
- National strategies and policies are incorporating bamboo more
- Technological developments and new applications
- South-South cooperation is growing
- Innovative partnerships and new donor relationships
What we’re doing in LAC:

- Spanish project
- IFAD programme
- Bamboo-water dynamic study in Brazil
- Jamaica symposium
- BAPA+40
Thank you!
